

Gluten Analysis

BIA #: **#Dal Makhani - Aromati**
091023C **Lentils and Beans**

<i>ALLERGEN</i>	<i>METHOD</i>	<i>LOQ (Limit of Qualification)</i>	<i>RESULTS</i>
<i>Gluten</i>	<i>CODEX</i>	<i>5ppm</i>	<i>< 5ppm</i>

*As one of the criteria for using the claim "gluten-free," FDA sets a gluten limit of **less than 20 ppm** (parts per million) in foods that carry this label. This is the lowest level that can be consistently detected in foods using valid scientific analytical tools. Also, most people with celiac disease can tolerate foods with very small amounts of gluten. This level is consistent with those set by other countries and international bodies that set food safety standards.
